An aerial photograph of the Østerbro district in Copenhagen, Denmark. The image shows a dense urban grid with numerous residential buildings, green spaces, and parks. A prominent white dot is placed in the upper right quadrant of the map, indicating a specific location. The text 'KLIMAKVARTER' is overlaid in white, bold, sans-serif capital letters to the left of this dot. The right side of the image shows the coastline and the water of the Øresund.

KLIMAKVARTER

CLIMATE ADAPTATION - POSITIVE AND RELEVANT

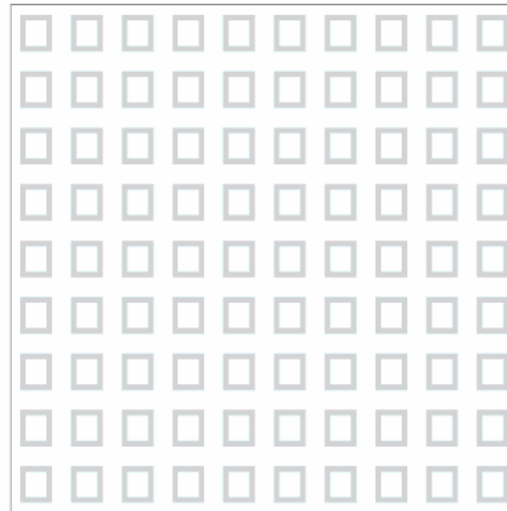

INFRASTRUCTURAL ISSUES - FROM PROBLEM TO POTENTIAL

Skt. Kjelds kvarter
Ca. 90 karréer på 100 ha

Generisk model
90 karréer på 100 ha

GENERIC NEIGHBOURHOOD

33% ROOF

33% ROAD

25% COURTYARD

8% GREEN SPACE

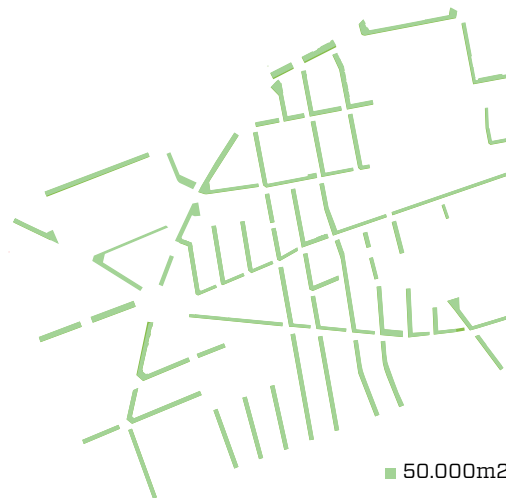

270.000 m²

Er vejarealet i Skt. Kjelds Kvarter i dag. Gaderne er langt bredere, end nødvendigt for at kunne håndtere den lokale trafik.

50.000 m²

Grønt areal kan vi skabe, hvis vi indretter gaderne efter gældende standarder - med trafik i begge retninger og samme antal parkeringspladser.

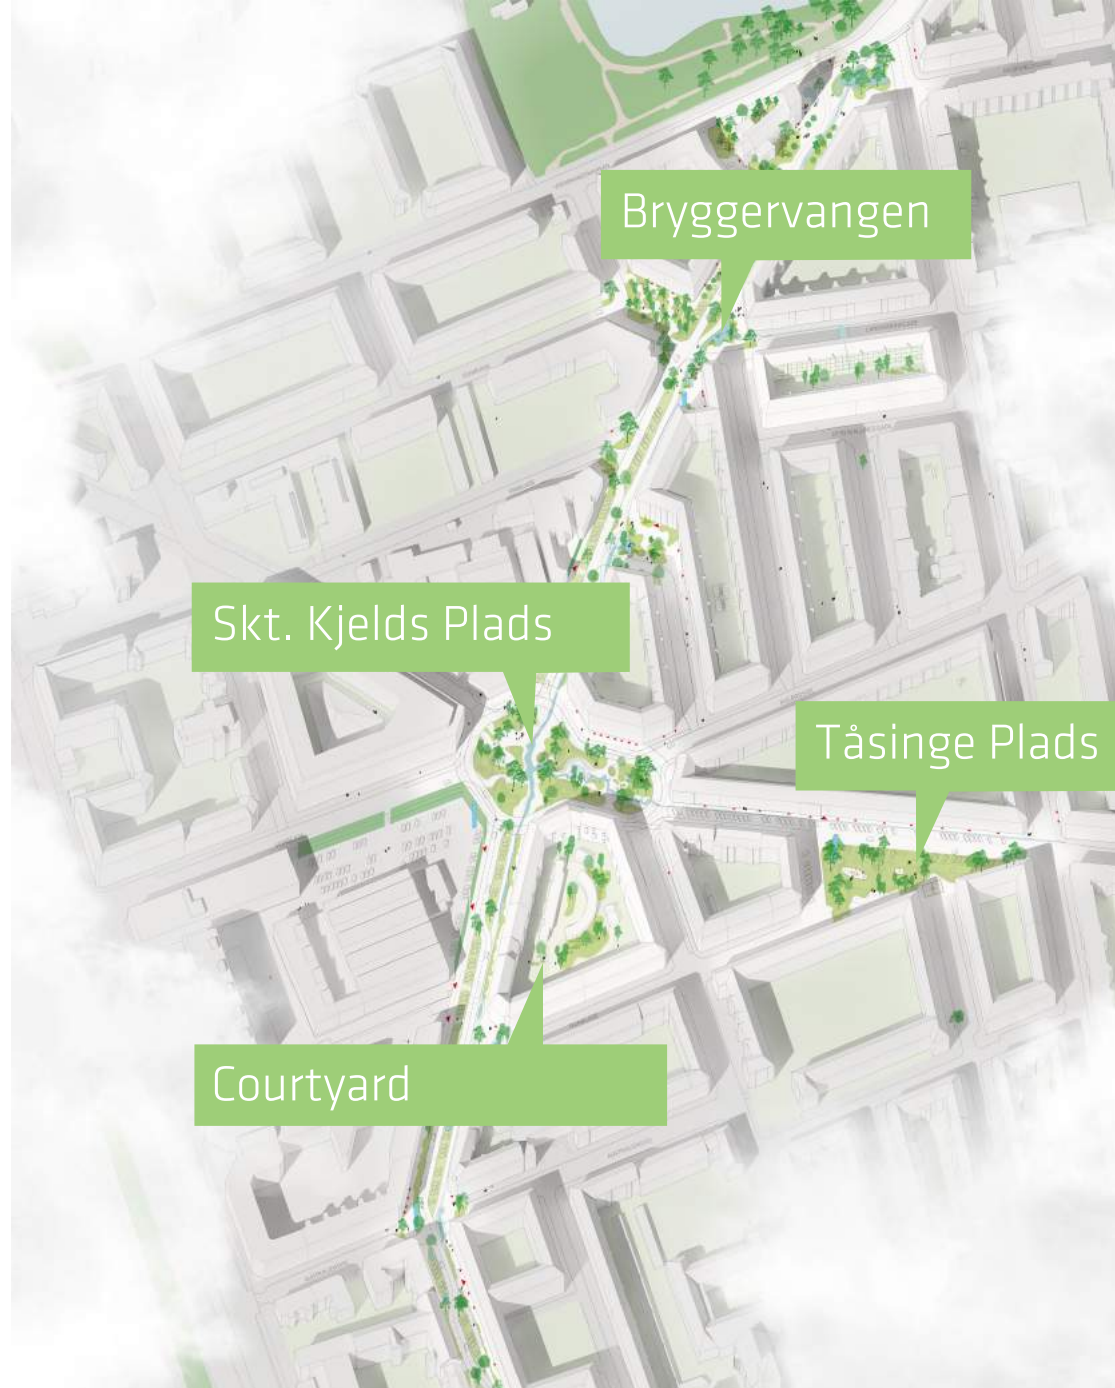

Bedre byliv

På den måde skaber vi plads til grønne korridorer, vejtræer, forhaver og blomstrende byrum. Uden at det koster en p-plads.
